

Penn-Delco Hosts Another Successful Technology Expo

Penn-Delco's 3rd Annual Technology Expo was recently held at Sun Valley High School. Students and faculty were on hand to demonstrate exciting and meaningful technology used every day in our classrooms.

Hundreds of guests, including community members, students, parents, Penn-Delco faculty and staff, and members of the Board of Directors attended the event. From the moment the doors opened, the halls were buzzing as students made their way to over twenty exhibits spread throughout the high school. Forty-one teachers and staff members from every school participated in the Tech Expo.

“Our colleagues from the Delaware County Intermediate Unit commented on how impressed they were with the level at which our staff infuses technology into the curriculum to elicit higher order thinking from our students,” stated Assistant Superintendent Dr. Alexis McGloin. “It was a very proud time in our district.”
