

## Reading Adventures Await...

This fall our elementary students will begin their language arts instruction with a totally new core reading program called Journeys published by Houghton Mifflin Harcourt. This program has been designed with a balance of shared, guided, and independent reading which will support literacy development. It uses a rich collection of literature in all the print material. There is a systematic and ongoing assessment system to inform the teacher of the strengths and needs of the students. The technology component will support instruction in the classroom and provide opportunities for students to log on and read from home as well.

The Journeys program incorporates best practices in reading instruction and literature that will be motivating for your children as they continue on their journey to become life long readers.
