## **Anxiety and Children with Autism**

All children and adults experience worry at times. But what happens when your child with autism seems to experience excessive fear and worry? Is it anxiety or is it autism? In this workshop we will discuss anxiety through the lens of autism spectrum disorder. You will learn how to make modifications to interventions you may already be doing to increase overall effectiveness for your child with autism. Specific fears such as getting a haircut or going to the dentist will also be discussed.
